

Testimonial: MUSE School

MUSE leading the way to a brighter educational system

Background

MUSE School is the first PCM school worldwide that is focussed on passion-based learning and sustainability.

MUSE cocreates the educational experience with their students from Early Childhood through 12th Grade through a rich academic programme that incorporates what they want to learn. The students' passions are the compass that guides their journey.

Training

MUSE is committed to developing the emotional intelligence of their students.

By teaching self-efficacy — the belief in one's ability to succeed — and by practicing effective communication skills through the Process Communication Model, MUSE students are well-positioned for living and working in the future.

Results

PCM has been implemented in all areas of the school.
Truly inspiring!
